Letter of recommendation

Dear Graduate Admission Committee,

I Dr. Soman, feel glad to recommend Mr. Ishaan Karode for the masters program at your reputed university. As a professor in the Department of Metallurgical and Materials Engineering at the Faculty of Technology & Engineering, The Maharaja Sayajirao University of Baroda, Vadodara. I have been acquainted with Ishaan since past 1 year. I have taught him subjects like Foundry Technology & Principles of Metal Joining. I had enough opportunity to observe him during the classroom teaching and laboratory sessions.

Apart from academics, he has managed to come up with flying colors in sports too. He is a national level badminton player and has represented Gujarat state several times at national level. He also holds the position of captain of the university team. Along with this, he was also a part of Volunteering team of the two biggest technical and non technical festivals of Gujarat namely Footprints and Paramarsh, organized by our faculty every year. He has even completed his vocational training at Vijay Tanks & Vessels (p) ltd for a period of fifteen days. Vijay Tanks & vessels basically a fabrication company which deals with welding, quality assurance and quality control too.

Mr. Ishaan, with his diligence, sincerity and smartness, has proven himself to be one of the best students for the faculty. He has maintained a commendable balance in his academics by showing keen interest in learning his subjects as well as extra-curricular activities. Despite undertaking so many activities, he makes sure to deliver his best in everything.

From my point of view, he is one of the best students I came across and it its pleasure being his teacher. I am sure that he would strive hard and make an outstanding effort to excel in his further studies. If granted admission, I am sure he will prove to be an asset for your institution as well. Thus, I strongly recommend him for the masters program at your esteemed university. I wish all the happiness and excellence in his future studies. In case of any further query you can contact me on my email id.

Dr. S.N.Soman
