LETTER OF RECOMMENDATION

I am writing this letter in support of **Mr. Ishaan Karode** who was a student of Metallurgical Engineering at The Maharaja Sayajirao University of Baroda, India. In my capacity as the head of the department, I have known him for almost two years and found him to be an aspiring and sincere student. I have taught him subjects like **Metallurgical Thermodynamics, Transport Phenomenon, and Steel Making**.

Mr. Ishaan took my classes very enthusiastically & sincerely. It is worth to mention that, the level of confidence and diligence that Mr. Ishaan has demonstrated in my classes is extraordinary. He is a man with lot of aspirations and goals along with effective perspectives.

Apart from academic excellence what impressed me much is his participation in extracurricular activities. He being the **Captain of University Badminton Team** has represented our university at state and national level, which is worth appreciating. Also he has actively participated in the college festivals during which he managed people well through his cooperative and supportive nature. I respect his decision to pursue his Masters degree in your esteemed university and I am confident that he will succeed equally in all endeavors.

At the end, I would like to restate about Mr. Ishaan Karode as a promising student who is confident and intelligent. With your most distinguished program, I believe he will further advance his understandings in his field and gain more valuable experiences. Therefore I strongly recommend him for admission and would appreciate your most favorable consideration to his application.

(Dr. S. K. Dutta)
